SKILLS

Languages/Databases: TypeScript, Postgres, SQLite, MongoDB, Redis

Frameworks: React, NextJS, Remix.run, SvelteKit, Serverless, Electron, Astro, Turborepo

Libraries: Node.js, Express, Redux, Zustand, Zod, Prisma, Tailwind, react-query, Twilio, Open AI, Puppeteer

WORK EXPERIENCE

SaaS Labs US Inc

Noida, India

SDE-1

July 2022 - Present Developed the <u>JustCall Dialer SDK</u> in **TypeScript**, enabling seamless integration across diverse web environments and

- improving developer adoption by more than 10x. Automated deployment pipelines with GitHub Actions, Changesets, and Vite, reducing deployment time by 40%, with 100% test coverage using Vitest.
- Built JustCall Al Notetaker a meeting automation bot for Zoom and Google Meet, built with Puppeteer, Node.js, and TypeScript. The bot records and transcribes over 1 million meetings monthly, boosting pitch efficiency and contributing to a 15% increase in sales conversions.
- Authored comprehensive test cases with Vitest and React Testing Library, reducing production bugs by 20%.
- Built the JustCall Global Search feature with React.js, Tailwind CSS, and TypeScript, powered by Node.js and Algolia backend. Integrated OpenAI for tag generation and custom scrapers for multiple products under the JustCall brands, supporting 10k+ daily searches and boosting user retention by more than 25% through improved accessibility.
- Conducted performance audits across all platforms, achieving a 30% improvement in application speed, directly influencing customer satisfaction and retention rates.
- Maintained the Apex, JustCall Chrome Extension, Dialer Web App and Desktop App using Remix.run, TypeScript, Electron, and Twilio; migrated legacy PHP codebase to Remix.run, boosting performance and scalability.
- Collaborated with sales and product teams to identify gaps, driving features that resulted in a 12% increase in customer acquisition and 8% higher revenue growth.

SaaS Labs US Inc

Remote

SDE Intern Aug 2021 - Mar 2022

Developed and maintained 5 web app suites with React, Next.js, and Node.js (Express), achieving a 32% performance boost through optimisations like lazy-loading, infinite scroll, debounce, and code splitting.

PROJECTS

Meme generator AI: AI-Powered Meme Caption Generator [github/live]

Apr 2023 - Current

Developed an innovative meme caption generator using Remix.run, TypeScript, Prisma, PostgreSQL and Tailwind, integrating Microsoft Azure Computer Vision and OpenAI for generating humorous captions from images.

heisenburg: An easy-to-use & Lightweight form validation library [github/live]

Dec 2024 - Current

Developed "Heisenburg," a suite of npm packages for form validation in JavaScript/TypeScript applications and popular frameworks. Built with TypeScript, leveraging tsup, Turborepo, and Changesets.

Connect: A real-time communication platform inspired by Omegle [github/live]

Mar 2024 - Current

Developed a modern, scalable web application using SvelteKit, Ably, and PostgreSQL, enabling seamless text chat between strangers.

Dialworks: On-Demand Sales Training Platform [live]

Aug 2021 - Mar 2023

Led the development of Dialworks, an on-demand training platform with a tech stack including React.js, Node.js, **Redux, react-query, and TypeScript**, fostering efficiency and cost-effectiveness.

Portfolio/Blog: Personal Portfolio/blog [github/ live]

Aug 2024 - Current

 A sleek personal portfolio and blog built with Astro, leveraging Tailwind CSS, MDX, and Drizzle ORM for seamless performance and dynamic content
